DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Fang et al (6,621,464).

Fang et al in figures 1-6 disclose a conductive element 1 including a ground portion 30 and a radiating portion 20 symmetrically disposed on the insulative substrate 5, the ground portion and the radiating portion symmetrically defining an L-shaped first 34 and second 24 slots respectively; and a feeder 40 including an inner core 42 connecting to the radiating portion and an outer shield 44 connecting to the ground portion, wherein the ground portion 30 comprises a first ground plate (at 344) and a second ground plate (at 342), and the first slot 34 is defined therebetween, wherein the radiating portion 20 comprises a first radiating plate (at 244) and a second radiating plate (at 242), and the second slot 24 is defined therebetween.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Korisch, Takahashi, Evans et al and Brady et al are cited as of interested and illustrated a similar structure to a multi-band dipole antenna assembly.
